## **5 year warranty**

Wildcraft warrants its products against defects in materials and workmanship for a period of 5 years from the time of purchase. This is a carry-in warranty that does not cover the damage caused by natural wear and tear over time, use under extreme conditions or due to improper care. If a product is deemed defective, Wildcraft will repair or replace it at its sole discretion.

# did you know?

Studies show that 64% of youngsters suffer from back pain. Most are traced to overloading or ill-fitting backpacks.

Improper posture  
Incorrect usage

Overloaded  
Ill-fitted

Proper posture  
Distributes load  
efficiently

## why wiki?

The vibrant Wiki Daypacks are ergonomically designed to reduce the load pressure on the back. Optimum Weight Balance technology gives the entire backpack a uniform tapering which holds the contents of your backpack closer to your body and hence keeps the weight distributed evenly.

Ergonomic  
tear drop  
design

Adjustable  
straps  
Curved &  
padded  
shoulders

Multi  
compartment  
organizers

Tough material,  
bonded nylon  
stitches, YKK  
zips

Lightweight

The image features a vibrant blue background populated with numerous stylized, abstract shapes representing amoebae. These shapes vary in color, including shades of yellow, red, green, light blue, and pink. Some shapes are elongated and spindle-shaped, while others are more rounded or irregular. The overall composition is dynamic and artistic, capturing the essence of the organism's form and movement.

## MORE FROM WIKI

### Sling Bags

Choose from the vibrant variety of sling bags that Wiki by Wildcraft offers. Made to fit all your daily essentials, this range is sure to make you the stylish one on campus.

### Accessories

Stylish, compact and convenient. Wiki by Wildcraft accessories range from pencil pouches through wallets to tiffin bags - use them for your stationery or simply as travel companions.

## ABOUT WIKI

The 'Wiki' range stands for ergonomic, dependable, vibrant and fun backpacks.

'Wiki' means 'quick' in Hawaiian. Our products are made to suit the quick, fast-paced and active lifestyles of urban-dwellers, and hence the name.

## Ergonomic

Comfortable and functional, the Wiki backpacks will prevent unwanted backaches.

Wildcraft India Pvt Ltd,15th Cross, Outer Ring Road,  
4th Phase, JP Nagar, Bangalore - 560078  
customercare@wildcraft.in

Prices are subject to change at the sole discretion of the company. Products may vary slightly from the pictures.

A person with long hair, wearing a red jacket and a backpack, is seen from behind, walking through a sunlit forest. The scene is filled with green foliage and bright sunlight filtering through the trees, creating a warm and natural atmosphere. The person's backpack has a red strap and a black handle visible.

# AUTUMN WINTER

**W**  
WILDCRAFT

Winters in India are as diverse as the country itself. From snow-laden peaks to the milder tropics, India's varied landscapes offer different challenges to adventurers, wherever they are.

Introducing HypaWarm, the new Autumn-Winter collection from Wildcraft that allows you to experience winters where it is best experienced - the outdoors.

All you have to do is step out. Don't hide this winter. Catch the cold.

**HYPAWARM**  
W I N T E R   W E A R

## INNOVATION FOR EVERY WINTER

Purpose-built to assist exploration in any condition, the HypaWarm collection is packed with products that help you gear up for every challenge this winter. Here is an overview of the technology that has gone into our latest range.

## THERMALLY MAPPED INSULATION PANELS

Integrated with thermally mapped insulation panels, HypaWarm's winter wear supplements natural human thermo-regulation in order to maintain an optimal core body temperature. Its differential insulation techniques correspond to the distinct temperature zones of the body, helping retain warmth in areas vulnerable to heat loss.

## CONTROLLED AIR PERMEABILITY AND ZONAL VENTILATION

BREATHABLE

Mechanically treated to help assist exploration in the winter, the HypaWarm range blocks out the chill in the wind, while enhancing ventilation within the garment. Zippered zonal vents allow a free flow of air, and the fabric traps warm air between the body and the garment for better insulation.

## WATER RESISTANCE

WATER  
RESISTANT

Coated with a special DWR (durable water repellent) finish, the HypaWarm collection prevents penetration of water through the garment and protects from the rain, ensuring that you keep dry during your outdoor pursuits.

## LIGHTWEIGHT AND PACKABLE

LIGHTWEIGHT

SELF-  
PACKABLE

PACKABLE

The HypaWarm collection ensures optimal insulation in every environment without compromising on weight and comfort. The range of jackets is also low on bulk and hyper-portable, thanks to our innovative packability feature.

## REVERSIBILITY

Just like its multi-purpose usability, the HypaWarm collection can be worn in more ways than one, with its reversible-ready jackets guaranteed to add flavour to your wardrobe.

# WILDCRAFT

**SPRING/SUMMER 2015**

**THE  
HYPACOOOL  
COLLECTION**

# **THE WILDCRAFT JOURNEY**

In the late 90s, a group of 3 friends, who were passionate about the outdoors, started Wildcraft in a garage. It was still early days for the outdoor and adventure industry in the country and quality equipment remained a distant dream for Indians. Spotting the opportunity, they channeled their passion for the outdoors into a company that would make international quality gear accessible to India's growing outdoor community. Be it outdoor-friendly clothing, ergonomically designed rucksacks or all-terrain footwear, Wildcraft has one mission - to craft durable, resilient and sturdy gear that enable people's exploration of the outdoors.

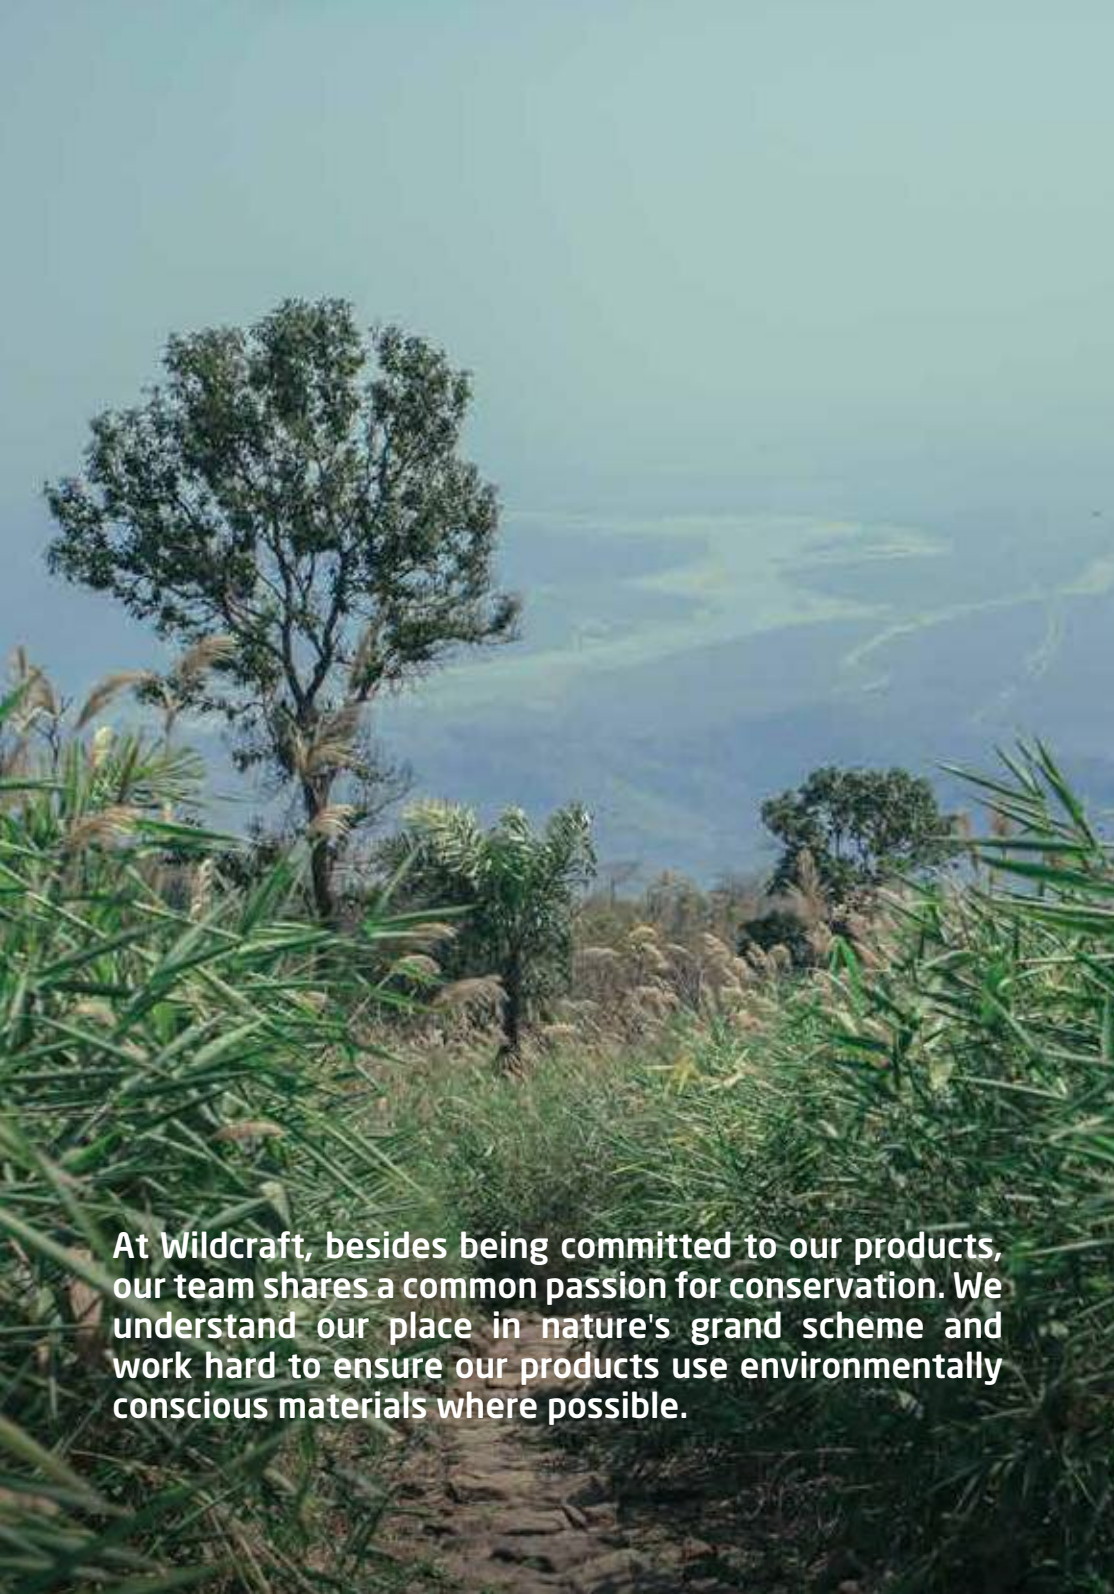

# SUMMER MINUS THE HEAT

There are few things as welcome on a hot day as the wind in your hair. Now imagine that feeling minus the burn, heat and sweat of summer. Presenting HypaCool, an outdoor clothing range designed to protect you from the season's most unpleasant aspects. Using technology and materials required for functionally superior outdoor clothing, the HypaCool collection features UV protection, sweat management and breathability. Take on the summer like never before.

**At Wildcraft, besides being committed to our products, our team shares a common passion for conservation. We understand our place in nature's grand scheme and work hard to ensure our products use environmentally conscious materials where possible.**

## THE BETTER COTTON INITIATIVE

Cotton is undisputedly one of the world's most important natural fibres. It supports nearly 250 million livelihoods and is considered to be a renewable natural resource, provided we manage it responsibly.

In the Hypacool collection, Wildcraft has introduced cotton that is certified by the Better Cotton Initiative (BCI) - a non-profit organisation that safeguards global best practices for Better Cotton. The BCI works with farmers to:

- **Reduce the harmful impact of crop protection via insecticides and pesticides**
- **Conserve water and use it efficiently**
- **Look after the health of the soil**
- **Conserve the natural habitat**
- **Track produce through the entire chain of supply to ensure compliance**

## RECYCLED POLYESTER

Almost everything we buy, from cosmetics to food and water, is packaged in PET\*. Global statistics tell us that nearly 8 million tonnes of plastic waste was thrown into oceans in 2010\*\* - this has implications on marine life and human health.

We have used recycled polyester in the manufacture of our clothing. PET forms the main input in the making of recycled polyesters and our suppliers are able to use both white and coloured PET bottles in the manufacture of their yarn. Recycled polyesters are free from petrochemicals, help conserve natural resources and are environmentally friendly.

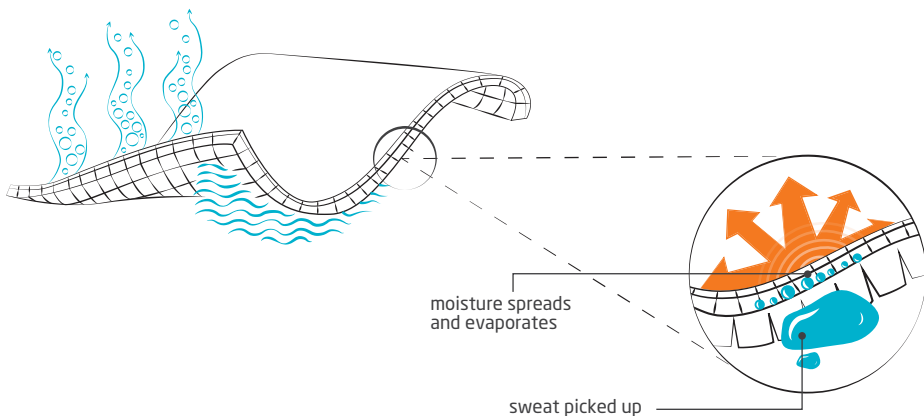

\***Polyethylene Terephthalate** or **PET** is a recyclable material most often found in single-serve plastic bottles, such as those used for soft drinks and water.

\*\*source - <http://www.thehindu.com/opinion/editorial/editorial-the-menace-of-plastic-waste/article6902381.ece>

# INNOVATION FOR OUTDOOR

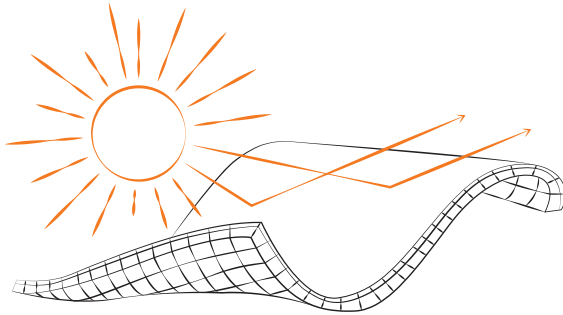

There is more technology and cutting-edge innovation that goes into your HypaCool apparel than you would imagine. Here's an overview.

## MOISTURE WICKING / QUICK-DRY

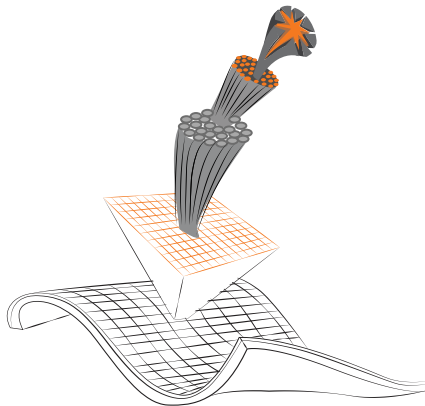

On a particularly hot day, one of the most uncomfortable sensations is that of a damp, sweaty shirt or pair of pants sticking to your skin. The moisture wicking feature in all HypaCool clothing is specifically designed to combat this. The fabric is treated with a wicking coating that draws the moisture to the surface and spreads it rather than letting it soak. The wind and heat then do their bit, drying the surface of the fabric quickly.

## UV PROTECTION

It is a widely known fact that over-exposure to solar ultraviolet (UV) radiation can cause sunburn, skin damage and increase the risk of developing skin cancer. That is why HypaCool clothing offers up to 50 UV Protection Factor (UPF). To put it simply, this means that only 1/50th of the UV radiation falling on the garment actually passes through to the skin.

## MICROFIBER FABRIC

A wonder fabric in more ways than one, microfiber offers the wearer unmatched durability. Moreover, the superior colour fastness on microfiber prevents your garment from fading and keeps it looking brand new for longer.

# MEN'S RUNNER TANK

This Runner Tank is made from light, breathable fabric. Its mesh panels keep your sweat zones ventilated and the material provides UV protection.

# INNOVATION FOR THE OUTDOORS

There is more technology and cutting-edge innovation that goes into your HypaDry rainwear than you would imagine. Here's an overview,

## DRY+VENT

Discover protection from the rain like never before with our new **DRY+VENT** technology. **DRY+VENT** technology keeps you dry while also allowing your skin to breathe. This breathable nylon fabric has nanopores that mimic the skin - small enough to keep rain out, but large enough to allow sweat to evaporate.

## LIGHTWEIGHT

Made out of polyester and nylon, as opposed to the traditionally used PVC material, the HypaDry collection is lighter than most other rainwear products found in the market today.

## **WATERPROOFNESS**

With unpredictable weather, you often get caught in heavy downpours. Once your clothes get wet, your reduced body temperature leaves you vulnerable to catching a cold.

The HypaDry collection features a range of high performance waterproof clothing. Coated throughout with polyurethane, the entire range is designed to keep you dry and comfortable.

## **SEAM SEALING**

No matter how waterproof the fabric, the stitching seams are still a vulnerable point for water seepage through needle-holes.

The seams on these products are 100% sealed using a seam-sealing tape to cover the needle holes. This extra measure ensures that there are no stray water droplets seeping in through the seams.

## **REFLECTIVE TRIM**

Constant rains often mean drivers and pedestrians are dealing with low light conditions. The HypaDry collection features a reflective trim on its products as a safety feature. The trim reflects light, indicating your presence in the dark.

# RAIN PONCHO

Price: ₹1295

The Rain Poncho slips over your head, covering you and your gear all at once. Constructed with fully sealed seams, it prevents water seeping in through the stitches, keeping you protected during your treks and hikes.

PACKABLE
